

About the University

IFTM Society runs IFTM University (erstwhile IFTM under control of Hindu Educational Society) which was established by (Late) Shri Onkar Saran Kothiwala, a philosopher, philanthropist and a community representative who has envisaged the education for all at the affordable rate which is continued by his successor Mr. Rajiv Kothiwala, the Chancellor, a worthy leader and a man for the socially backward students. The legacy of providing education to all is still continued by the University in the form of free transport around periphery of 100 km and free uniform to all the students. The lush green campus is spread in 67.17 acres. The state-of-the-art facilities provides the ambiance conducive to learning. The University is strategically located on the NH-24 (Lucknow-Delhi Highway) in Moradabad, a city known for its brass exports. The campus has all-weather connectivity and approachable by public conveyance at the affordable fare from every nook and corner of the city.

About the Course

Research is a cornerstone for the advancement of knowledge and the promotion of academic and societal development. In the recent past, the interdisciplinary nature of research work has evolved significantly. To cope with interdisciplinary research problems and find the solutions in a better way, one needs a thorough understanding of research problems and focused research. Research Methodology is a step-by-step plan for conducting research in a systemized manner. There has been a fast-changing pattern in research over the last decade concerning approaches, analysis, validity and utility perspectives. To critically review recent research approaches, designs and appropriate data analysis tools for quality research, such platform is required. This workshop aims to develop research aptitude among new researchers with sound knowledge of tools and techniques of statistics and to enhance the research skills of researchers through understanding the concept of the research process, including research purpose, research questions/problems, literature review, data collection and analysis and research-based writing, etc.

Objectives of the Course

- To provide understanding of the concept and purpose of research.
- To describe the components of the research process and their interconnections.
- To provide insights into the suitability of research design as per the objectives of the research.
- To explore data requirements, sampling schemes and questionnaire based data collection.
- To enable participants for impressive research writings in the form of research papers and thesis.

Course Pedagogy

The course will employ a combination of lectures, software-based hands-on sessions, group work, assignments, and field activities. Topics will be taught using pedagogical tools such as:

- Lectures and interactive sessions
- Computer-based data analysis
- Research proposal writing
- Questionnaire design and fieldwork
- Presentations and submission of a final report

Target Audience

This course is beneficial for the faculty members, research scholars from Sciences, Biosciences, Social Sciences, Management, Humanities and other disciplines involving research methodology and data analysis.

Certificate

Participants who successfully complete the Course and fulfill all requirements (including attendance and assignments) will receive a certificate of participation.

How to Apply
