Organized

Webinar on International Seeds Day

April 26, 2021

IFTM UNIVERSITY, MORADABAD
NAAC ACCREDITED
School of Agricultural Sciences and Engineering
In association with IQAC
Organizing
WEBINAR
On the occasion of
International Seeds Day
Date: April 26, 2021
Time: 02:00 PM - 03:00 PM
Eminent Speaker

Prof. Sanjeev Agarwal
Registrar
Co-Patron

Prof. M. P. Pandey
Vice Chancellor
Patron

Dr. C. N. Mishra
Scientist (Plant Breeding)
IIWBR, Karnal, Haryana

Mr. Abhay Saini
[Asst. Professor, SASE]
Co-Convener

Dr. Yashpal Singh
[Asst. Professor, SASE]
Convener

Mrs. Richa Khanna
[Asst. Professor, SASE]
Organizing Secretary

Dr. Krishan Pal
[Head, SASE]
Co-Chairman

Dr. Virendra Singh
[Director, SASE]
Chairman

For farmers, seed is life. The integrity and sanctity of every seed should be preserved and protected. The need is to strengthen local production, consumption and marketing of organically grown food and products to ensure the health and wellness of the citizens and to provide assured income to the farmers. Keeping these points in view, on the occasion of International Seed Day, School of Agricultural Sciences and Engineering, IFTM University, Moradabad organized a webinar to discuss about the importance of seed in agricultural production. Seed is one of the vital inputs of agriculture and in the absence of quality seed not only the production will decline but the quality of the product will also deteriorate. The eminent speaker of webinar was Dr. C.N. Mishra,

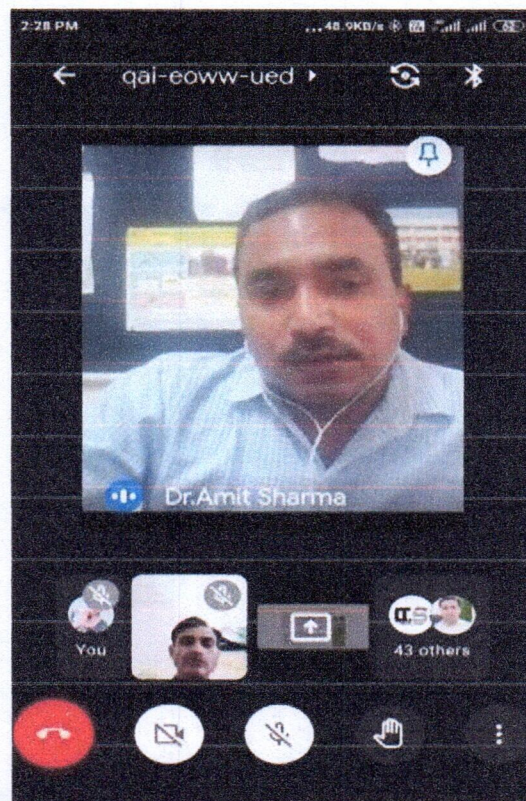

Sanjeev Agarwal
Registrar
IFTM University
Moradabad.

Scientist, Plant Breeding, IIWBR, Karnal, Haryana. "Seed is the basic and most critical input for the sustainable agriculture. The response of all other inputs depends on the quality seed to a large extent. Therefore, seeds should be sovereign from all types of private ownership and also away from any technology that go against the sustainable growth of the planet," Dr. C.N. Mishra Said. He urged the farmers and young budding minds *i.e.* students that agriculture is nothing without quality seeds and we should focus on improving its quality. The programme coordinators were Dr. Yashpal Singh, Mrs. Richa Khanna and Mr. Abhay Saini.

Outcome:

The students and farmers gained knowledge about quality seed production and its importance in successful agriculture. They also learned about various seed production technologies ongoing at IIWBR, Karnal, Haryana.
