#### (57) Abstract:

The present invention relates to the preparation of ethanolic extract of corn silk, and to evaluate its invitro- anti oxidant activity and anti-microbial activity. In the present study, the antioxidant activity of CSEE was determined using different models such as DPPH, ABTS radical scavenging activity, phosphomolybdenum activity, Metal chelation activity and antimicrobial activity was investigated by agar well diffusion method. Ethanolic extract was found potent in all in-vitro models and plant also exhibited significant antimicrobial activity. The presence study suggested that Corn silk ethanolic extract, a budding resource of natural antioxidants.
