(57) Abstract :

The present invention relates to the extraction of fixed oil from the fruit of Ehretia acuminata and evaluation of the chemical composition. It also includes the process of extraction of fixed oil from the fruit. The prepared fruit fixed oil is evaluated for the chemical components by using the GC-MS analysis. The prepared fruit fixed oil is evaluated for various biological activities such as antioxidant activity, antidiabetic activity, anti-inflammatory activity antihemolytic activity, photoprotective activity, antimicrobial activity and statistical analysis.
