PUBLICATION OF THE PATENT OFFICE

INTRODUCTION

In view of the recent amendment made in the Patents Act, 1970 by the Patents (Amendment) Act, 2005 effective from 01st January 2005, the Official Journal of The Patent Office is required to be published under the Statute. This Journal is being published on weekly basis on every Friday covering the various proceedings on Patents as required according to the provision of Section 145 of the Patents Act 1970. All the enquiries on this Official Journal and other information as required by the public should be addressed to the Controller General of Patents, Designs & Trade Marks. Suggestions and comments are requested from all quarters so that the content can be enriched.

(57) Abstract :

The present invention relates to evaluate the antipsychotic potential of Angilica glauca L. roots as it is claimed in traditional Ayurvedic literature to be used to treat the psychosis like conditions. The roots of plant were purchased from its natural habitat and authenticated prior to the experimental work. physicochemical properties of roots were evaluated and reported. The extraction was performed using two solvents- water and ethanol by cold maceration and hot percolation method respectively. The alcoholic extract showed the presence of alkaloids, carbohydrates, glycosides, phenolic compounds, and tannins while aqueous extract showed the presence of phenolic compounds and tannins. TLC was performed and solvent system for HPTLC was developed. Finger print was developed by HPTLC which can be used in the future for identification of this plant. In animal study, all the test groups were found to reduce the symptoms of psychosis induced by Ketamine. The best response was found in the group treated with 600 mg/kg dose.
